

Front Collection 2020

Eggersmann – a 111-year-old, 4th Generation German company, is the oldest family owned kitchen manufacturer in Germany.

At Eggersmann we are focused on individual designs and have taken modern to the next level with our UNIQUE collection that features furniture designs using genuine granite, marble, quartz and steel finishes. As an FSC Certified manufacturer, Eggersmann is always considering and improving the carbon footprint and environmental effect on the planet. As an industrial manufacturer Eggersmann offers the largest collection of engineered wood veneers and environmentally friendly lacquered surfaces in high-gloss, textured, and matt with unlimited color combinations! Eggersmann has a brand reputation for the flexibility in custom cabinetry design and sizing along with award winning state-of-the-art components and accessories.

For many years, Eggersmann has been an in-demand and successful partner for the outfitting of projects of all sizes, ranging from a very exclusive villa to a large-scale development with several hundred kitchens. Cabinetry and Casework from Eggersmann fulfill all the demands made by discerning clientele and premium developers with regard to logistics, planning, brand recognition, aesthetics and quality.

The experience in international projects around the globe will bring value to your home or development. Eggersmann can offer perfect order handling, competent and talented in-house design and processing team, high-performing and extremely flexible products and a program containing internationally oriented design trends for every market. All of this comes together to create the best team for successful cooperation and exceeding customer's satisfaction around the world.

Eggersmann distribution partners, located in each global market center, are the direct contacts for designers, architects and developers to discuss and design projects of all types and sizes.

Together ensure perfect handling along with installation, shipping logistics, site management, and after-sales service and concierge support.

UNIQUE[®]

By the system unique eggersmann is designing, developing and manufacturing a collection of kitchens and interior decorations which can hardly be matched for its timelessness and minimalism.

The name unique really says it all.

The focus is on individuality and also exceptional and exclusive materials. The fundamental idea of this system is the homogeneity of all visible surfaces. Front and side panels as well as grip channels, plinth panels and worktops are made of just one identical material. Cutting-edge details such as 45° beveled edges/joints apply to fronts, side panels and worktops. In addition to various types of natural stone, solid stainless steel with silvertouch finish, Corian as well as Fenix NTM can be used.

Nature cannot be standardized

We deliberately use many natural materials in our system unique but, although all our materials conform to the same high standard, no natural stone slab is completely flawless, nor are any two slabs exactly alike.

Therefore, kindly note the following information:

The structure of valuable natural stone surfaces includes characteristics of authenticity, which, in their diversity, do not occur altogether on a small stone sample. In the case of natural stones, strong veins, fine cracks, air pores, mineral inclusions etc. are preserved as characteristics for "real stone". Such variations must be taken for what they are: that is, not faults but proof that real stone slabs have been used. Many slabs are required for a unique kitchen and, within each of those slabs, there are varying degrees of structure, color and veining. This makes the uniform color and structure processing extremely difficult and can lead to the typical appearance of natural stone: partial structural deviations and/or color variations, which, however, underline the naturalness.

Nero Assoluto honed

Material: Granite

Granite is a primordial or deep-seated rock which was formed when the earth's crust cooled between 500 and 800 million years ago.

- Granite is characterized by its **hardness** and it is **scratch-resistant, acid-resistant, heat-resistant** and **easy to clean** when following the clean and care instructions.
- **Each Granite** features **different surface condition** and **air pores** as well as the **different gloss level and color** of contained minerals make each natural stone kitchen **unique**.
- **Variations in the color, structure and open-cell character of natural stones are unavoidable.**

Montank Black honed

Material: Slate

Slate is a 350-million-year-old sedimentary rock. We offer our slate collection with an uneven surface treatment.

- Due to the fine natural layering, the slate is **very dense**. As a result, the intrusion of liquids is almost completely prevented and makes the slate **resistant to stains**.
- Slate is **very sensitive** to **scratches**, but small marks of use can easily be made invisible with the provided care solution.
- **Variations in the color, structure and open-cell character of natural stones are unavoidable.**

Grafite brown leather

Material: Limestone

Limestone is a sedimentary stone of biogenic origin. Limestone products are sandblasted and treated with diamond brushes.

- Veins, cracks and open sections are **considered typical for Limestone** surfaces.
- The **structural capability** of Limestone may be weakened by the **naturally occurring veins and cracks**. Therefore **improper handling and shocks during transport** can lead to **breakage** of fronts, side panels and worktops.
- Limestone is **NOT resistant to acids**.
- **All liquids occurring in the household such as fruit acids, vinegar, wine, water, etc.,** as well as **fats and oils leave marks in the Limestone and have to be removed immediately from the surface**.
- **The marks at the surface** that contains due to regular usage are **unavoidable** and give the Limestone its **distinctive character**.
- **Variations in the color, structure and open-cell character of natural stones are unavoidable**.
- **These sensitivities of the Limestone must be specifically explained to the end customer and the acceptance and agreement of the customer must be documented in writing**.

Arabescato polished

Material: Marble

Marble is formed by the metamorphic transformation of limestone, dolomite and other carbonate rocks under the influence of high pressure and high temperature in the core of the earth. Marble is sandblasted and treated with diamond brushes.

- Veins, cracks and open sections are **considered typical for Marble** surfaces.
- The **structural capability** of Marble may be weakened by the **naturally occurring veins and cracks**. Therefore **improper handling and shocks during transport** can lead to **breakage** of fronts, side panels and worktops.
- Marble is **NOT resistant to acids**.
- **All liquids occurring in the household such as fruit acids, vinegar, wine, water, etc.**, as well as **fats and oils leave marks in the Marble and have to be removed immediately from the surface**.
- **The marks at the surface** that contains due to regular usage are **unavoidable** and give the Marble its **distinctive character**.
- **Variations in the color, structure and open-cell character of natural stones are unavoidable**.
- **These sensitivities of the Marble must be specifically explained to the end customer and the acceptance and agreement of the customer must be documented in writing**.

7055 Arabescato polished

Surface characteristics

 Stain sensitivity	4
 Acid sensitivity	4
 Scratch sensitivity	4
 Cleaning and maintenance effort	4

■ max. size for slabs:	2400 x 1300 mm
■ Material thickness:	11 mm
■ Material weight:	29,7 kg per sqm

from 1 (immune/fine) to 4 (sensitive/suboptimal)

Carbono waterjet

Material: Quartzite

Quartzite is a metamorphic rock formed when sandy quartz particles and natural cementing agents are subjected to high pressure and high temperatures.

- Quartzite is characterized by its **hardness** and it is **scratch resistant, acid-resistant, heat-resistant** and **easy to clean** when following the clean and care instructions.
- **Each Quartzite** features **different surface condition** and **air pores** as well as the **different gloss level and color** of contained minerals make each natural stone kitchen **unique**.
- **Variations in the color, structure and open-cell character of natural stones are unavoidable.**

■ Material thickness:	11 mm
■ Material weight:	31,1 kg per sqm

from 1 (immune/fine) to 4 (sensitive/suboptimal)

Matrix honed

Material: Phyllite

Phyllite is a quartz containing slate formed about 300 million years ago. The slaty surface is achieved by a special brushing process.

- Phyllite is characterized by its **hardness** and it is **rarely scratch-sensitive, acid-resistant, heat-resistant** and **easy to clean** when following the clean and care instructions.
- **Each Phyllite** features **different surface condition** and **air pores** as well as the **different gloss level and color** of contained minerals make each natural stone kitchen **unique**.
- **Variations in the color, structure and open-cell character of natural stones are unavoidable.**

Fenix core

Fenix core is a solid laminate material. The surface involves the use of nanotechnology. Thanks to this technology: Besides the main properties, such as an extremely matt, soft touch, and anti-fingerprint surface and the thermal healing of microscratches. This innovative material stands out for specific properties which facilitate normal cleaning and do not require particular maintenance. Fenix core it is extremely easy to clean and is resistant to mold, it has enhanced anti-bacterial properties, it is resistant to rub, scratches and abrasion, as well as to acid solvents and household reagents. Fenix core is heat-proof up to 150° C.

Stainless Steel silverTouch

Material: Hot Rolled Stainless Steel

Solid stainless steel – worktop and panels are 5 mm thick and front panels are 3 mm thick - in 1.4301 (V2A).

The silverTouch slabs are hot-rolled and this process creates, in conjunction with atmospheric oxygen during the cool-down process, a surface that is characterized by very good scratch resistance and low sensitivity.

These effects are additionally supported by the hand applied silverTouch grinding surface.

Caused by the production process silverTouch may have rolling marks, inclusions, and other imperfections!

This is not a manufacturing fault but characteristics of the material.

- max. size for slabs: 4500 x 1480 mm
- Material thickness: 3 mm frontpanels /
5 mm side panels and worktops
- Material weight: 3 mm thickness: / 24 kg per sqm
5 mm thickness: / 40 kg per sqm
- Stainless steel silverTouch
worktops, side panels and shelves
see page u81

908 Stainless Steel silverTouch

Brushed Brass

Solid Brushed Brass – 3 mm thick, waxed finish.

Due to the material properties of brass, the surface may show flowmarks, small scratches or similar irregularities. In addition, brass oxidizes very easily and quickly in conjunction with atmospheric oxygen.

As a result, discolorations or stains due to e.g. all types of liquids or hand perspiration will occur immediately and these kind of changes in the surface may already occur during transport due to environmental influences.

This is a typical characteristics of real brass and has to be accepted. It is up to the end consumer if they prefer to try and keep the brass bright with metal polishing creams, or allow it to naturally oxidize.

- max. size for slabs: 2980 x 1480 mm
- Material thickness: 3 mm
- Material weight: 24 kg per sqm
- Brushing direction: horizontal
- Side panels in Brushed Brass see page u81

- Due to the described material properties, real brass is not recommended as worktop material.

Projects

In addition to the individually planned custom made products, eggemann also produces kitchens for project installations. In recent years many building projects all over the world have been fitted with our high quality products. The volume can vary from a few exclusive penthouse units to a large-scale project with several hundred kitchens. Our project department along with the respective national agency guarantees perfect execution of planning, logistics, assembly and after-sales service.
